Diagnosing Diagnostics: Ideas, Solutions, and Misconceptions

Melissa Mugambi
Department of Global Health, University of Washington

In this talk, Dr. Mugambi will discuss her experiences and lessons learned from community-based work, research, and the philanthropic sector in trying to increase access to simple, user-friendly diagnostics in Eastern and Southern Africa.

Melissa Mugambi, MD, PhD, is an Assistant Professor in the Department of Global Health at the University of Washington. Prior to this appointment, she served as a Program Officer and Fellow on the Bill and Melinda Gates Foundation's Diagnostics Team. Her current practice and research interests focus on designing service delivery models to optimize access to health technologies in antenatal care programs and fostering local health product development efforts through entrepreneurship and training.
